Equipment Slot Expansion

A simple player guide to adding more Compound Slots to your equipment.

What is Slot Expansion?

Slot Expansion lets you add extra **Compound Slots** to equipment that supports compounding.

Talk to **Alchemist Nate** and choose **Add a combination slot** to open the expansion window.

Slot Limits

Regular compoundable equipment	**Up to 4 slots**
Legendary boss equipment	**Up to 5 slots**

The maximum number of slots depends on the equipment type. Legendary equipment obtained from bosses can reach one additional slot.

Important: Slot Expansion can fail. Without protection, a failed attempt may destroy the equipment.

Required & Optional Materials

The main elixir is required. Auxiliary items are optional, but they can make the process much safer.

Nate's Elixir

The standard Slot Expansion material. Use it on normal compoundable equipment to expand toward a maximum of **4 Compound Slots**.

Nate's Special Elixir

The advanced version of Nate's Elixir. It is used for equipment that can reach **5 Compound Slots**, such as Legendary Boss equipment.

Azoto of God

Optional support item that **increases the success rate** of Slot Expansion. Useful when attempting the harder later slots.

Hephaestus's Protection

Optional protection item. If the expansion fails, it **prevents the equipment from being destroyed**. It is consumed when used.

Also available: Azoto of Luck - a weaker success-rate booster than Azoto of God.

How to Expand an Equipment Slot

1. Talk to Nate
Choose **Add a combination slot** from Nate's menu.

2. Register the equipment
Place the equipment you want to expand in the top section of the Slot Expansion window.

3. Add the main material
Register **Nate's Elixir** or **Nate's Special Elixir**, depending on the equipment and its maximum slot limit.

4. Add auxiliary items
Optional: add **Azoto** to improve the success chance and/or **Hephaestus's Protection** to protect the equipment from destruction.

5. Check the fee and expand
Review the displayed success rate and protection status, then proceed with the attempt.

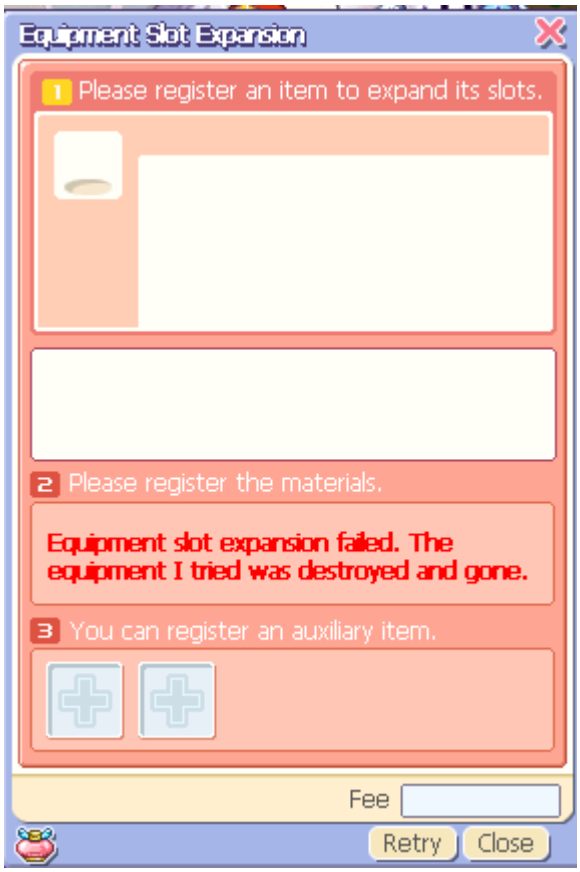

The window shows the current number of slots, the maximum expandable slots, the success rate and whether equipment destruction protection is active.

What Happens if Expansion Fails?

There are two possible failure outcomes depending on whether protection was registered.

Protected failure
The attempt fails, but the equipment is kept because Hephaestus's protection was active.

Unprotected failure
The attempt fails and the equipment is destroyed.

Recommended Player Tips

Use protection on valuable gear. Legendary and highly upgraded equipment is not worth risking unprotected.

Later slots are harder. Consider using a success-rate booster when attempting the final slots.

Check the maximum first. Normal equipment stops at 4 slots; Legendary Boss equipment can reach 5.

Quick Summary: Register your equipment, add the correct Nate Elixir, optionally add success/protection items, pay the fee and attempt the expansion.

Where to Get the Slot Expansion Items

The auxiliary items can be crafted in Megaloshop by Compounder Paul.

Compounder Paul - Megaloshop

Bring 1,000,000 Galder Check items and choose the material you want to compound.

The amount of checks required depends on the item.

Azoto of Luck

7 x 1,000,000 Galder Checks

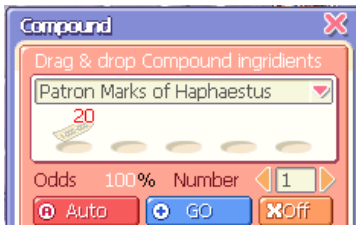

A basic success-rate booster for Slot Expansion.

Azoto of God

15 x 1,000,000 Galder Checks

A stronger success-rate booster for harder expansion attempts.

Patron Marks of Hephaestus

20 x 1,000,000 Galder Checks

Protects the equipment from being destroyed if Slot Expansion fails.

Quick Route: Megaloshop -> Compounder Paul -> Select the item -> Register the required checks.

The checks are used as the compounding material shown in Paul's Compound window.

How to Get Nate's Elixirs

Nate's Elixir and Special Nate's Elixir (Akuaregia) can be obtained in two ways.

1. Harkon Defense Reward Shop

Exchange Harkon Coins directly for the two Slot Expansion elixirs.

Nate's Elixir

50 Harkon Coins

Special Nate's Elixir

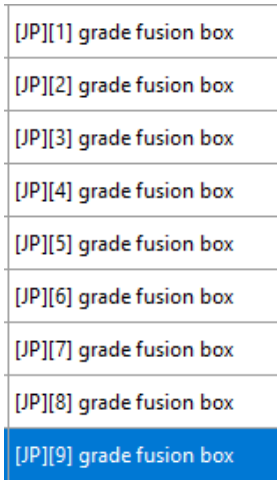

70 Harkon Coins

BETA PRICES

These reward-shop prices are currently in beta and may be adjusted in a future update.

2. Grade Fusion Boxes

Akuaregia can also be obtained as a reward from Grade Fusion Boxes.

Grade 9 = lowest grade

Grade 1 = highest grade

Higher grade = better chance

The higher the Grade Fusion Box, the greater the chance of obtaining an Akuaregia item.

Tip

Higher-grade boxes give you a better chance at the elixirs.
