Leveling, Rewards, Quests & Galder Progression

TricksterU is designed to accompany your entire adventure - from your first levels all the way to level 400.

Meet [GM]CyL - Your Adventure Guardian

[GM]CyL, the eagle, will be watching over your journey. How does he help? With presents! As you reach specific level milestones, he will send useful rewards directly to your mailbox.

Keep an eye on your mail icon

Under your MP bar you will see the envelope icon. When its number increases after reaching a milestone, it means [GM]CyL has sent you a new gift. Open it and see what is waiting for you!

1. Faster Questing and Leveling

Quest Items Drop x3

Quest farming is much faster in TricksterU. Items required by quests drop in quantities of x3, so you spend far less time repeating the same monster hunt just to collect the required materials.

Boosted Quest EXP and TM EXP

Quest rewards have been increased, so completing story, key, regional, and other quests gives much more EXP and TM EXP than normal. Questing is a major part of your progression path.

Prefer grinding instead?

That works too. Whenever [GM]CyL is connected, a server EXP boost can be activated for everyone. If you would rather grind monsters than follow quests, watch for the boost and make the most of it.

2. Galders Are Your Main Progression Currency

Everything you need can be earned with Galders

As introduced in TricksterU, the core items you need to strengthen your character can be obtained through normal gameplay and Galders. Level-up gifts from [GM]CyL also include bank checks to help you buy, upgrade, and improve your equipment.

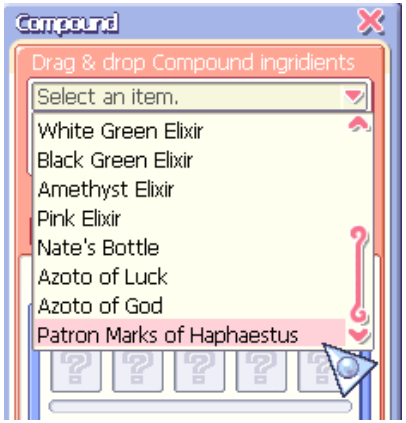

Bank your unused Galders

If you are carrying Galders that you do not plan to spend immediately, converting them into 1,000,000 Galder Checks is recommended. You can buy bank checks from Andrew in Megalopolis Bank. Checks are useful for keeping large amounts of currency organized and for several TricksterU systems.

3. Compounder Paul - Your Progression Supply Hub

Style and character items
Hair dyes and other customization materials are available alongside practical progression items.

Slot Expansion support
Nate's Bottle, Azoto of Luck, Azoto of God, and Patron Marks of Hephaestus can be found here.

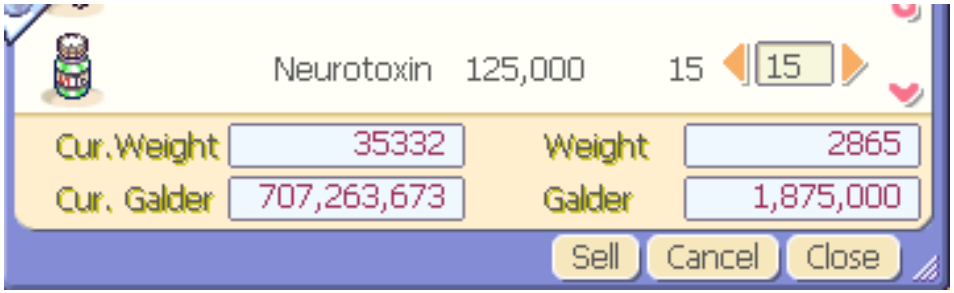

Upgrade and utility materials
Repair Powder, Growth Vitamin, Protein Candy, Lock Candy, Gold Tempering Gem, Artisan's Flame, Shara's Bottle, Pet Drink, and more.

Where to find him

Compounder Paul can be found in Coral Beach Town, Paradise, and Megalopolis. His shops contain many of the materials used by TricksterU's custom features, so your Galders always have a purpose.

4. How to Earn More Galders

Sell valuable quest items

Besides looting Galders directly from monsters, quest items become an important source of income later in the game. Starting from Techichi Volcano, quest items have increased selling values, so unused drops can be turned into a solid amount of Galders.

Chaos Tower drops are worth more

Chaos Bytes obtained in Chaos Tower also have increased selling prices. If you spend time farming the tower, the drops you collect can become another reliable way to build up your Galder reserves.

Plenty of ways to fund your adventure

Monster drops, valuable quest items, Chaos Tower loot, level-up gifts, and bank checks all help keep your progression moving. Do not worry about running out of options - TricksterU gives you many ways to earn the Galders you need for equipment, upgrades, and every major feature.

Discover, progress, and above all, enjoy. Happy TricksterU!
