TricksterU Halloween Event Part 2

October 2026 · The Zombified Moon

Defend Caballa Island at all costs!

Nine of the most famous bosses of the island have come back from the dead, and every field they haunt needs heroes. Grab your party and put them back in the ground where they belong.

How it works

- **Nine Zombified bosses**, and each one has its own fields or dungeon. Page 2 shows where.
- **One in every map.** Each of those maps has its own Zombified boss, and it rises again **every 45 minutes**.
- **Death made them tougher.** They have 75% more HP than the bosses you remember. Bring friends.
- **They all carry the Halloween loot:** six Star Cards, Compound Waste and Good Compound waste. See page 6.

Who can fight them?

Everyone. The weakest one is level 71 and the strongest is level 730, so there is a Zombified boss for every Trickster. Start where you feel safe and climb from there.
