Pet Hunt Guide

Let your pet search for items while you continue your TricksterU adventure.

Your pet has its own hunt capacity

The demonstrated pet shows an 80% Hunt Rate and a maximum of 200 collected items.

What is Pet Item Hunt?

Pet Item Hunt sends a compatible pet to search for items in an eligible map. Its finds are stored in a separate collection window until you bring the pet back and move them into your inventory.

Why use it?

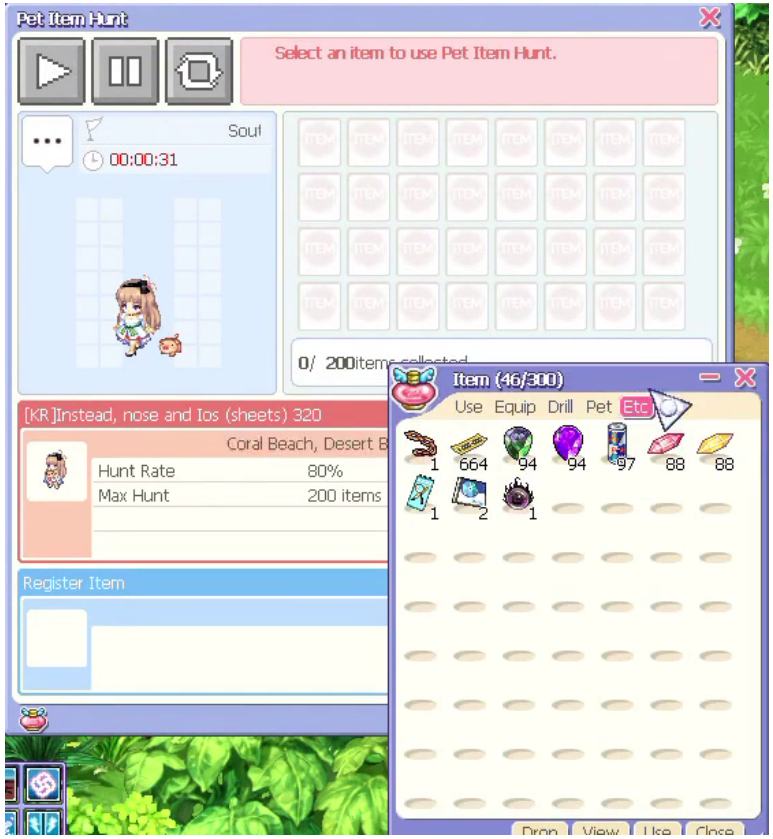

Gather extra items while you keep playing. In the video, the character moves around and fights monsters while the hunt runs, then returns to collect the results.

Before you begin

- Your character must be **Level 30 or higher**.
- Use a compatible pet with **3 stars or more**.
- The pet’s level cannot exceed your own.
- Unequip the pet before registering it.
- Bring a **Pet Item Hunt consumable**.

Prepare Your Pet

Open the hunt window, register your pet and supplies, then start the search.

The supply registration limit is separate from your pet's collection capacity.

1. Open Pet Item Hunt

Right-click your character and choose the **Pet Item Hunt** icon from the circular menu.

2. Register a compatible pet

Select a pet from your inventory for the **Register Pet** slot. Review its Hunt Rate, Max Hunt, and eligible areas in the panel.

3. Register a hunt consumable

Add a compatible item to **Register Item**. The video uses **Pet Drink**, which displays **Fast** hunt speed.

Common hunt supplies

Item	Speed	Max registered
Pet Rice Ball Ev	Slow	100
Pet Ice Cream	Normal	200
Pet Vitamin	Normal	200
Pet Drink	Fast	300

Start, Return and Collect

Keep adventuring while your pet hunts, then bring it back to retrieve its finds.

4. Start the hunt

Click **Start** (the triangle). The window tracks the hunt time and collection count. You can close the window and continue playing, as shown in the video.

5. Bring your pet back

Use **Pause** to stop hunting, then **Return** to bring your pet back. Once it returns, the collected items become available to manage.

6. Move the items

Select a collected item and click **Move** to transfer it into your inventory. Use **Delete** only for an item you want to discard.

Make room for your finds

An inventory-full message prevents transfers. Free space in your character inventory, and empty the pet’s collection before starting another hunt.

The video shows the collected rewards being selected and transferred into the character’s inventory.

Pet Strength and Hunting Areas

Choose a suitable pet for the region you want to explore.

Pet hunt tiers

Pet tier	Base hunt rate	Max Hunt
3 stars	70%	100 items
4 stars	80%	200 items
5 stars	90%	300 items

These are the base tiers configured for supported pets. Check the hunt window for your selected pet’s displayed values.

Pet level matters

Regional eligibility uses the pet’s level. Your character must also be Level 30 or above, and at least as high-level as the registered pet.

Configured regional level ranges

Area	Pet level
Coral Beach, Desert Beach, Megalopolis	1–400
Relics	30–400
Wharf, Mermaid Palace, Mirage Island	60–400
Seabed, Rose	90–400
Swamp	120–400
Snow Hill, Underground Dev Room	150–400
Techichi, Alteo Empire	180–400
Tapasco	210–400
Abyss	270–400

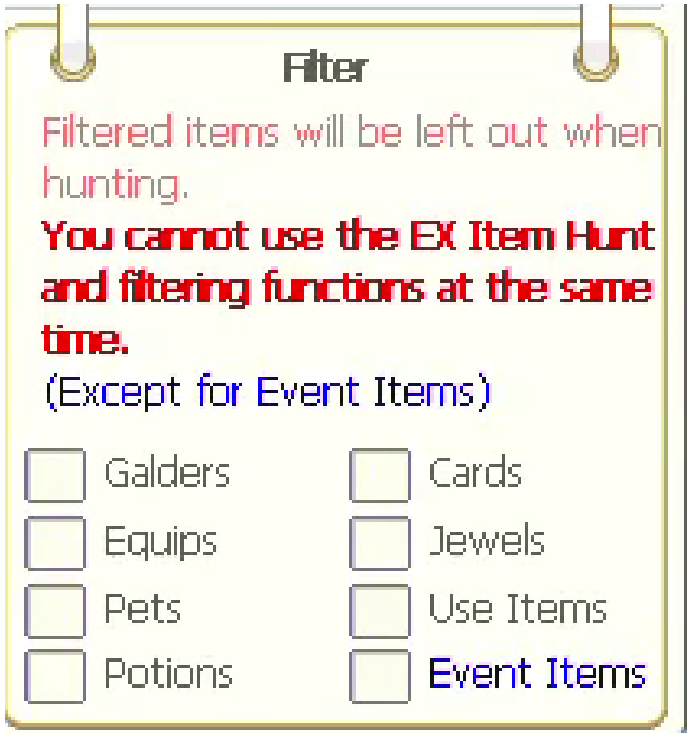

Special maps

Some maps are unavailable. Special drilling maps require the appropriate special ability.

A region entry does not mean every map in that region supports Pet Item Hunt.

Filters and Special Finds

Control what your pet collects and understand its extra reward options.

Filter out unwanted categories

Checked categories are **excluded** from the hunt. The filter list includes Galders, Equips, Pets, Potions, Cards, Jewels, Use Items, and Event Items.

EX Item Hunt and filters

EX Item Hunt cannot be used together with the normal filtering functions. **Event Items is the exception**, as stated in the game's hunt window.

What is EX Item Hunt?

Certain pets have an additional reward pool. Configured examples include Galder coupons and checks, Great H / M Potions, Star Card Pack No.5, Dimension Card Pack, and specific Witch's Brooms.

Rewards depend on the pet

These are possible EX rewards for specific configured pets, not a guaranteed reward list for every hunt. A compatible 3-star-or-higher pet does not automatically have an EX reward pool.
